

KYB

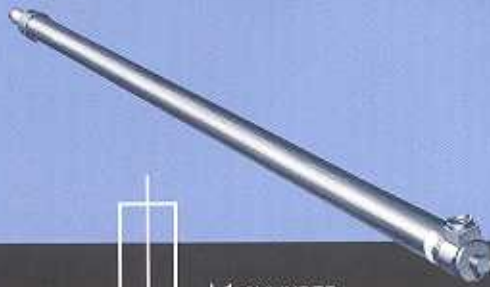

HYDRAULIC CYLINDER

KCFL SERIES

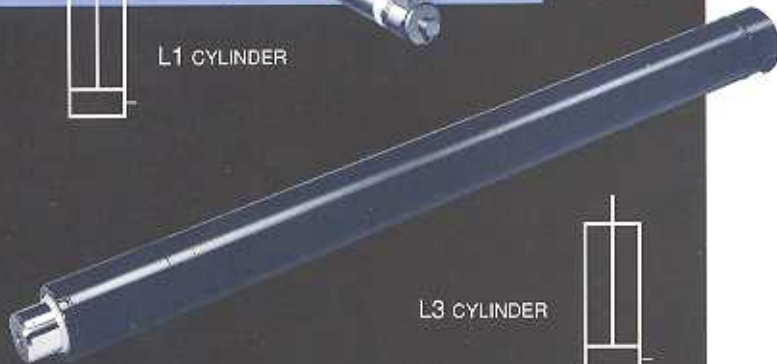

KAYABA INDUSTRY CO., LTD.

CYLINDER KCFL SERIES

L1 CYLINDER

L3 CYLINDER

PRODUCT DESCRIPTION

Maximum pressure : 18.1Mpa
 Temperature : -20°C ~ 100°C
 (Cold Area : -40°C ~ 90°C)

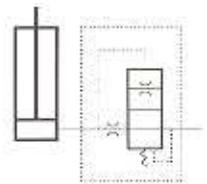

FEATURES

KCF Series lift cylinders are highly durable, single acting piston type cylinders produced through the Kayaba's unique production technologies for minimizing tube wall thickness and for welding process by pursuing best adaptability to the forklift truck mechanism.

Kayaba's house-made seal system will ensure smooth cylinder stroking and minimized oil leakage. The roller-burnished inner surface of the tube will enhance the smooth and anti-wear performance.

Piston rods are well protected against corrosion and abrasion with hard chrome plating.

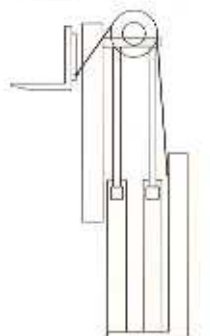

A down safety valve is available at option that will ensure safety in such an accident as pipe breakage (even a complete stop of the operation is possible).

A built-in type shock absorbing system is also available for a better cushioning performance.

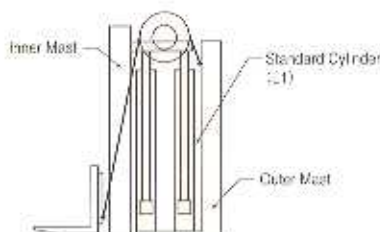

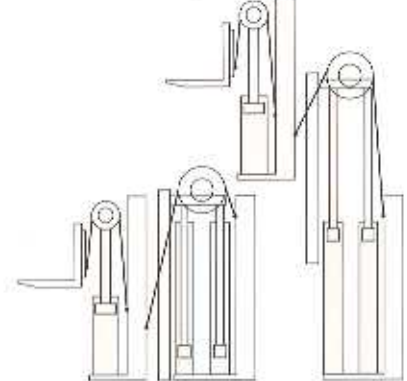

LIFT CYLINDERS AND INSTALLATION
